

FENDWRAP

SUPERIOR YACHTING PROTECTION

SUPERIOR PROTECTION PRODUCTS FOR THE YACHTING INDUSTRY

PRODUCT OVERVIEW BOOKLET

Respect has to be earned.
Reputation has to be built.
Perfection has to be created.

Superior products, best results.

Fendwrap is the temporary protection materials specialist for busy project managers and painting contractors within the marine industry.

The Fendwrap range ensures protection of surfaces at all stages of the manufacturing, refit and maintenance processes including on teak flooring, interiors, spraying tents, scaffolding, decks and paint work. Our products are designed to make it easier for you to achieve a superior result for your clients while enjoying significant cost and time-saving benefits.

Our products have evolved as a result of listening closely to our customers, and focusing on creating unique and innovative solutions. These enable you to achieve a higher quality finish more easily and with less risk. We also offer a range of flexible, bespoke solutions that answer specific needs, such as reusable protection kits. We can print your logo onto many of our products, to advertise the quality of your workmanship to passers-by and other contractors.

FENDWRAP
SUPERIOR YACHTING PROTECTION
NEPTUNE 107 FILM

Neptune 107 Film

PROTECTION FILM

Our superior and unique range of films have been designed specifically for the needs of the yachting industry.

Features

- **Strong** – one of the strongest films on the market
- **Consistent quality** – always the same Fendwrap brand
- **Time saving** – far quicker to use especially for applications such as tenting
- **Application** – can be easily applied by one person
- **Stronger adhesive** – 25% stickier than any other films
- **Zero residue** – no residue left when peeled from the surfaces
- **Waterproof** – once applied gives water protection
- **Personalisation*** – can be printed with your logo
- **Bespoke sizing*** – rolls can be cut to your choice of length and width

Uses

Creating Tents

Protection of:

- **Scaffolding**
- **Walkways**
- **Bulkheads**
- **Off-board work areas**

Over other delicate protection materials.

To secure and waterproof areas.

Complementary products

Maxboard

HIGH QUALITY PROTECTION FOR FLOORING AND WALLS

Fendwrap Maxboard is used widely in the yachting industry for general protection. Often used in conjunction with our Neptune 107 Film, it provides a high quality and fast protection for large areas, including high traffic and rigorous environments.

Features

- **Heavy duty** – lasts longer, less re-works
- **Durable** – for rigorous and tough environments and all general protection
- **Bespoke sizing** – can be supplied ready-cut to fit your project or needs
- **Personalisation** – can be printed with your logo
- **Fire retardant** – option available

Uses

Protection of:

- **Floors**
- **Teak**
- **Bulkheads**
- **Other large areas**

Complementary products

- **Neptune 107 Film**
- **F-Tapes**

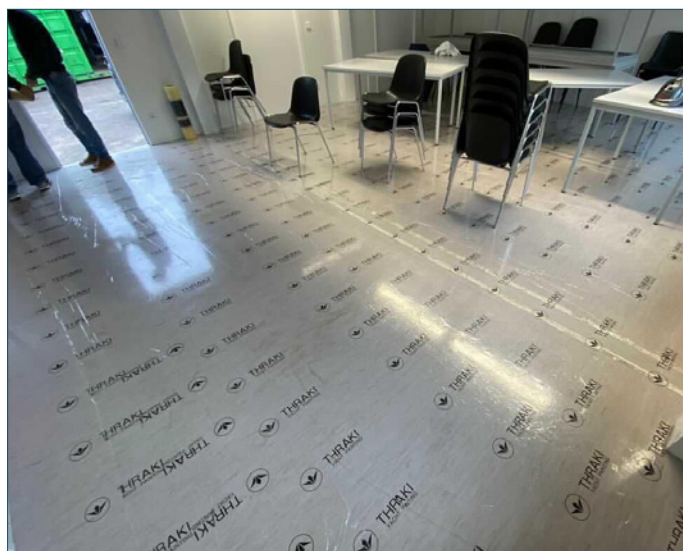

FENDWRAP

FENDWRAP

SUPERIOR YACHTING PROTECTION

FOAMPRO

Foampro

BREATHABLE WATERPROOF FOAM

Fendwrap Foampro is a low tack, non-woven foam that offers superior protection for delicate surfaces and flooring. Using a waterproof PE lined backing, this product achieves the blend between offering extra protection whilst still being kind to the surfaces it is used on.

Features

- **Easy to use** – easy to cut, and very little tape required to fix in place. Easy to apply
- **Breathable** – one of the only products on the market that allows the surface underneath to breathe
- **Waterproof** – suitable for use in mildly wet environments
- **Non-slip** – in dry conditions it provides a safe working surface
- **Tear resistant** – difficult to break or tear accidentally due to the strength of the fibres
- **Taping** – can be taped along the joints for extra protection.

Uses

Protection of:

- **Floors**
- **Teak**
- **High Gloss**
- **Varnish**
- **Glass**
- **Polished Metal**
- **Furniture**

Complementary products

- **F-Tapes**

Turtleboard

UNIQUE SURFACE PROTECTION

A unique product that gives a hard, shell protection on the outside and a soft, gentle inner skin. Turtleboard's inner surface will absorb grit rather than scratch the delicate surface, whilst its hard outer shell still gives maximum protection.

Features

- **Heavy duty** - lasts longer, less re-works
- **Durable** - for rigorous and tough environments and all general protection
- **Tough** - hard protection on the outside
- **Gentle** - soft protection on the inside
- **Options** - Rigid and Flexi grades
- **Re-usable** - at least five times
- **Turtleboard kits** - cut to bespoke shapes & sizes
- **Personalisation** - can be printed with your logo

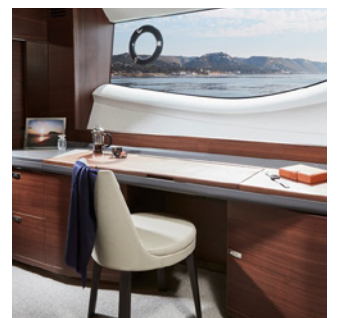

Uses

Protection of:

- **High Gloss**
- **Varnish**
- **Furniture**

Complementary Products

- **Neptune film**
- **Maxboard**
- **F-Tapes**

Fastmask

TAPED SHEETING

For quick masking of large areas our Fastmask films are easy to use with the single taped edge. By attaching the taped edge immediately and unfolding the film, they're great for ensuring a good quality masking job.

Features

- **Fast** – can be used by one person
- **Zero leakage** – always deliver a first-rate result
- **Bespoke widths** – save time by always having the right width product for the job
- **Bespoke adhesives** – adhesives can be adjusted on larger quantities.

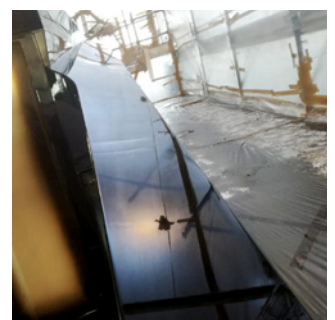

Uses

Protection of:

- **Tenting & Scaffolding**

Complementary products

- **Neptune film**
- **Maxboard**
