

FENDWRAP

SUPERIOR YACHTING PROTECTION

SUPERIOR PROTECTION SOLUTIONS FOR THE YACHTING INDUSTRY

SOLUTIONS OVERVIEW BOOKLET

Respect has to be earned.
Reputation has to be built.
Perfection has to be created.

Being focused on careful attention to detail helped us to create the right solutions for the challenges our industry faces in the protection of beautiful yachts.

We understand the high demands of our sector and are here to support each contractor & painter in achieving that perfection.

Over the years, our customers have continuously found new improvements and efficient ways of working through using the Fendwrap range of products.

SOLUTIONS
**TENTING &
SCAFFOLDING**

SOLUTIONS

TENTING &

SCAFFOLDING

The creating of a tent or scaffolding protection can make the difference between a project that is well run, and one that isn't. Our solutions have been proven to reduce the time taken by 50% compared to traditional tenting methods.

Our Tenting & Scaffolding Products:

Neptune 107 Film

The flagship product of the Fendwrap range, the 107 Film is respected and revered in the industry for its superior quality and consistency. Used in many shipyards for securing tents, walkways and many other uses. The ultimate way to secure your tent and scaffolding from dust, dirt, grime, minor scratches and paint overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Fastmask

A combination product, Fastmask is created from masking film with one edge taped with marine masking tape. This enables quick application of the film to large areas as it can be applied by one person. Available in various sizes.

F-Tape - Vinyl Tape

Otherwise known as the Tenting Tape, our superior brown vinyl tape is used widely for securing tenting film and other materials.

Also available printed with your logo.

F-Tape - Double Sided Tape

Sticky on both sides, our Double Sided Tape is often used on scaffolding to secure non-adhesive sheeting products in place.

This can help to reduce the requirement for other tapes too.

fendwrap.com

SOLUTIONS

**TEAK & FLOORING
PROTECTION**

SOLUTIONS

TEAK & FLOORING PROTECTION

The floor area of a yacht is where the most damage occurs due to the high traffic levels during projects. Protecting floors well can make the difference between high re-work and low re-work costs.

Our Teak & Flooring Protection Products:

Neptune 149 Film

Specifically designed to protect timber and laminate surfaces from dirt, grime, dust, minor scratches and overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Maxboard

Our superior quality fluted board is used widely in shipyards for protection of many surfaces from damage.

Available in a wide range of colours, manufactured to bespoke shapes and sizes. A fire retardant option is also available.

Trimat

The ultimate protection from the rubber Trimat matting. Its unique pattern enables you to save costs due to less material being used in manufacture, whilst still giving the ultimate protection.

Resistant to heavy impact and recommended to be used alongside a film or other surface protection underneath to give further protection from dust and dirt.

Oxguard

Bring an environmentally friendly protection material to your project!

A tough and sustainable floor covering, Oxguard will give ultimate protection from many types of damage.

Recommended for use with the F-Tapes to secure it in place.

For more information on our range of protection products visit fendwrap.com

SOLUTIONS

GELCOAT & GRP PROTECTION

SOLUTIONS

GELCOAT & GRP PROTECTION

With the sensitivities of gelcoat surfaces and the high cost of re-working, it is crucial that products protect well but don't damage the surface.

Our Gelcoat Protection Products:

Neptune 128 Film

Specifically created for protection of sensitive surfaces such as gelcoat, the 128 Film will protect from dirt, dust, grime, minor scratches and overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Foampro

Unique with its breathable qualities, Foampro provides superior scratch protection along with effective defence against dust, dirt and overspray. It has light adhesive on one side to cling to the surface and is also waterproof.

Can be manufactured to bespoke shapes.

For more information on our range of protection products visit fendwrap.com

A close-up photograph of a chrome car handle mounted on a light blue car body. The handle is sleek and modern, with a curved, aerodynamic shape. The car body has a smooth, glossy finish that reflects light, creating a bright, curved highlight. The background is a dark, out-of-focus blue.

SOLUTIONS

**HIGH GLOSS &
VARNISH
PROTECTION**

SOLUTIONS

HIGH GLOSS & VARNISH PROTECTION

Surfaces that have a high gloss or sheen can be difficult to adhere to without damaging the shine. We have created solutions specifically to solve this problem. If protection is required for new paintwork please discuss with one of our experts first.

Our High Gloss & Varnish Protection Products:

Neptune 149 Film

Specifically designed to protect timber and laminate surfaces from dirt, grime, dust, minor scratches and overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Foampro

Unique with its breathable qualities, Foampro provides superior scratch protection along with effective defence against dust, dirt and overspray. It has light adhesive on one side to cling to the surface and is also waterproof.

Can be manufactured to bespoke shapes.

Turtleboard

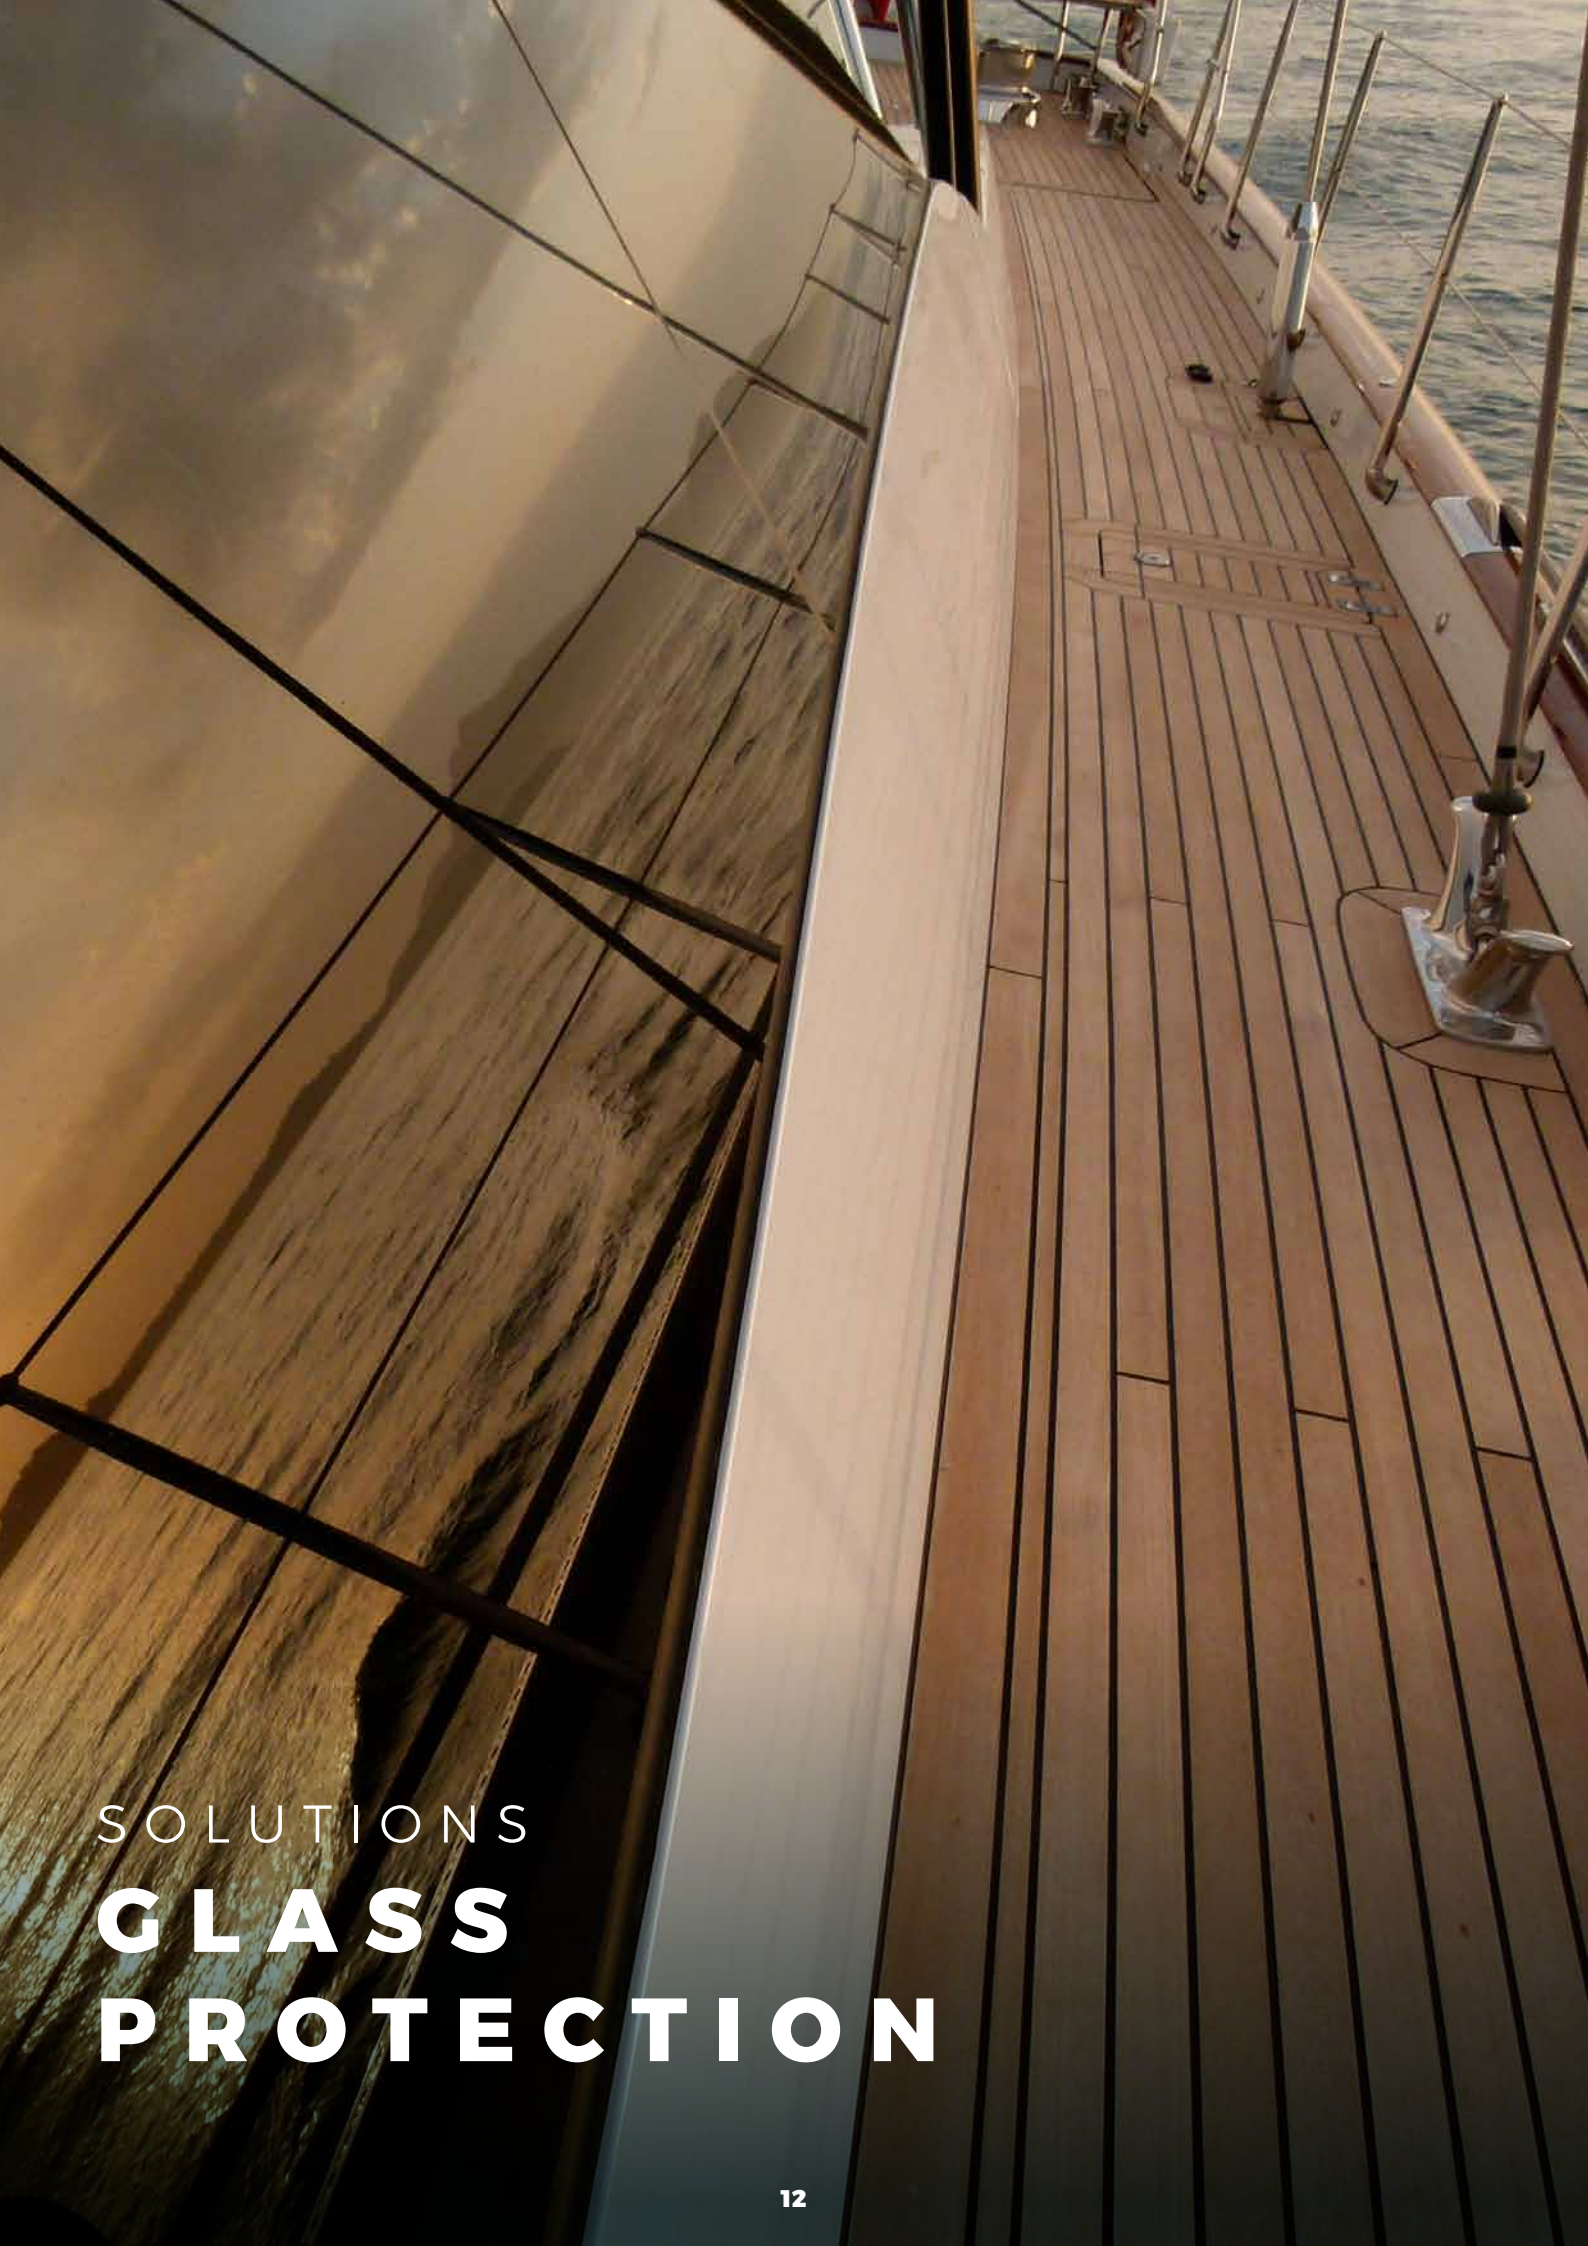

Unique with its hard outer shell and soft inner, Turtleboard is designed to protect the most delicate and expensive surfaces. The soft inner material is absorbent to help prevent any grit on the surface scratching it, and the hard outer material gives increased impact protection. Can be supplied in kit form for re-using 5 – 8 times. Can be manufactured to bespoke shapes. Available in Rigid and Flexi grades, and various colours.

F-Tape - Yellow Tape

A waterproof tape perfect for use during painting, leaving an excellent paint line. It allows for easy wet removal for up to 60 minutes. Very good heat resistance and does not tear when removed. Ideal for use when securing finished surface protections for long periods. No residue left when removed.

SOLUTIONS

GLASS

PROTECTION

SOLUTIONS

GLASS

PROTECTION

Glass is a sensitive surface that also requires the same level of careful protection during projects.

Our Glass Protection Products:

Neptune 170 Film

Specifically designed for protection of glass from dirt, dust, grime, minor scratches and overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Neptune 212 Film

The black / white film is specifically designed to protect highly polished surfaces. It gives protection from dirt, grime, dust, minor scratches and overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Foampro

Unique with its breathable qualities, Foampro provides superior scratch protection along with effective defence against dust, dirt and overspray. It has light adhesive on one side to cling to the surface and is also waterproof.

Can be manufactured to bespoke shapes.

F-Tape - Blue Tape

An easy-tear, UV resistant and waterproof paper tape suitable for use on smooth surfaces with absolute residue-free removal.

Suitable for water and solvent based paints.

F-Tape - Masking Tape

Like all of our products, the F-Tape range of tapes has been specifically designed for the yachting sector. The masking tape is a superior general purpose tape with many suitable uses, including for securing other protection materials in place.

SOLUTIONS

**POLISHED METAL
PROTECTION**

SOLUTIONS

POLISHED METAL PROTECTION

Polished metal gives the finishing touch to a beautiful yacht. However it is often located in high traffic areas where damage is common.

Our Polished Metal Protection Products:

Neptune 212 Film

The black / white film is specifically designed to protect highly polished surfaces. It gives protection from dirt, grime, dust, minor scratches and overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Foampro

Unique with its breathable qualities, Foampro provides superior scratch protection along with effective defence against dust, dirt and overspray. It has light adhesive on one side to cling to the surface and is also waterproof.

Can be manufactured to bespoke shapes.

SOLUTIONS
**FURNITURE
PROTECTION**

SOLUTIONS

FURNITURE PROTECTION

Furniture needs to be protected whilst it is being built, during installation, and all the way to project completion.

Our Furniture Protection Products:

Neptune 149 Film

Specifically designed to protect timber and laminate surfaces from dirt, grime, dust, minor scratches and overspray.

Our range of Neptune films are waterproof. They are easy to apply as no taping is required, because they have their own adhesive.

Foampro

Unique with its breathable qualities, Foampro provides superior scratch protection along with effective defence against dust, dirt and overspray. It has light adhesive on one side to cling to the surface and is also waterproof.

Can be manufactured to bespoke shapes.

Turtleboard

Unique with its hard outer shell and soft inner, Turtleboard is designed to protect the most delicate and expensive surfaces. The soft inner material is absorbent to help prevent any grit on the surface scratching it, and the hard outer material gives increased impact protection. Can be supplied in kit form for re-using 5 - 8 times. Can be manufactured to bespoke shapes. Available in Rigid and Flexi grades, and various colours.

F-Tape - Yellow Tape

A waterproof tape perfect for use during painting, leaving an excellent paint line. It allows for easy wet removal for up to 60 minutes. Very good heat resistance and does not tear when removed. Ideal for use when securing finished surface protections for long periods. No residue left when removed.

F-Tape - Masking Tape

Like all of our products, the F-Tape range of tapes has been specifically designed for the yachting sector. The masking tape is a superior general purpose tape with many suitable uses, including for securing other protection materials in place.

SOLUTIONS

**FIRE RETARDANT
(FR)**

SOLUTIONS

FIRE RETARDANT (FR)

After increasing demand for yacht protection products that are retardant to fire, we have developed a fire retardant version of Maxboard.

Our Fire Retardant Product:

Maxboard

Our superior quality fluted board is used widely in shipyards to protect many surfaces from damage.

It is available in a wide range of colours and can be manufactured to bespoke shapes and sizes. We also offer a standard, non-fire-retardant option.
